Emre SAYER
CEO

Our Message

Dear Customer;

I would like to thank you for your interest and trust in Frimpeks.

I am proud to inform you that Frimpeks, which was established in 1988 as a family company, has grown rapidly over the years and has become one of the leading companies in our industry both locally and globally. Our sustainable growth has been a reflection of the hard work of our qualified employees dedicated to innovation, focused on quality, customer relations, and after-sales services.

With the redefinition of the supply chain disrupted by the pandemic, our products have become more preferred in terms of both quality and price. Therefore, the reflection of postponed demands on sales and the increase in our production volumes, on the other hand, also have a direct effect on increasing our export volumes. We continue to take decisive and strong steps forward to realize our strategy of becoming a global player in the world label market in line with our 2025 vision. I am pleased to report that we have doubled our production capacity, especially with the investments we have made. In addition, we plan to make new investments in our production facilities in the UK in the coming years, which will increase our annual production capacity by more than 120 million square meters to a total of 600 million square meters.

We are proud of the results that we have achieved with our corporate vision, which is backed up by our strategically positioned customers, our technology, our quality, our employees, our efforts in social responsibility, and our environmental awareness.

During my customer visits both in Türkiye and around the world, I take great pride in witnessing the perseverance and dedication of our teams. We will continue to work on our corporate achievements which concentrate on adding value to you and your business, our employees, and to the society in which we operate.

I would like to thank all of you for your trust in us and wish you a healthy and better future.

Emre SAYER
CEO

Self-Adhesive Products

Pressure-Sensitive Label Materials

Right Label for the Right Product with our Pressure-Sensitive Label Materials!

Operating in this industry for over 30 years, we continue producing visually impressive and more sustainable pressure-sensitive self-adhesive label materials for you. Thanks to our expertise and innovative approach, we help you to select the optimal materials for your needs.

Self-Adhesive Products

Graphic Products and Solutions

Bring Your Designs to Life!

In a fast-paced and increasingly competitive market, you can use our products for any interior or exterior applications to attract consumer attention to your display areas.

Our wide product range is specifically designed to achieve high resolution, rich colors, and excellent results on many systems such as eco-solvent, solvent, UV, and latex printers.

Our product portfolio contains;

- Digital Printing (including PVC-free) Films
- Coloured Plotter Films
- Etched Glass Films
- Floor Graphic Films
- Lamination Films

A photograph of two workers, a man and a woman, in a factory setting. They are wearing white t-shirts and grey overalls with orange accents. They are smiling and looking at a large sheet of printed material, possibly a film or paper, that is being processed on a machine. The background shows industrial equipment and a clean, well-lit environment. A red graphic overlay is on the left side of the image, containing the text 'Inks and Coatings'.

Inks and Coatings

Inks and Coatings

Your Printed Materials are Now More Eye-Catching Than Ever!

We developed our UV inks and coatings, considering the changing and evolving printing industry, as well as the OFFSET, SCREEN, FLEXO, and DIGITAL printing technologies used in the industry with our more than 30 years of production experience and our endless R&D studies.

Our UV Inks portfolio;

- Flexo Inks
- Offset Inks
- Screen Printing Inks
- Shrink Sleeve Flexo Inks

Our UV Coatings portfolio;

- Flexo Coatings
- Offset Coatings
- Screen Printing Coatings
- Digital Coatings
- Special Coatings

UV Inks and Coatings

Inks and Coatings

Make Your Printed Materials More Appealing Than Ever!

Our water-based (Dispersion) inks and coatings are specifically formulated with the latest technology for commercial, carton, and label applications. This provides performance characteristics that help packages and publications withstand the rigors of shipping, handling, and in-store display.

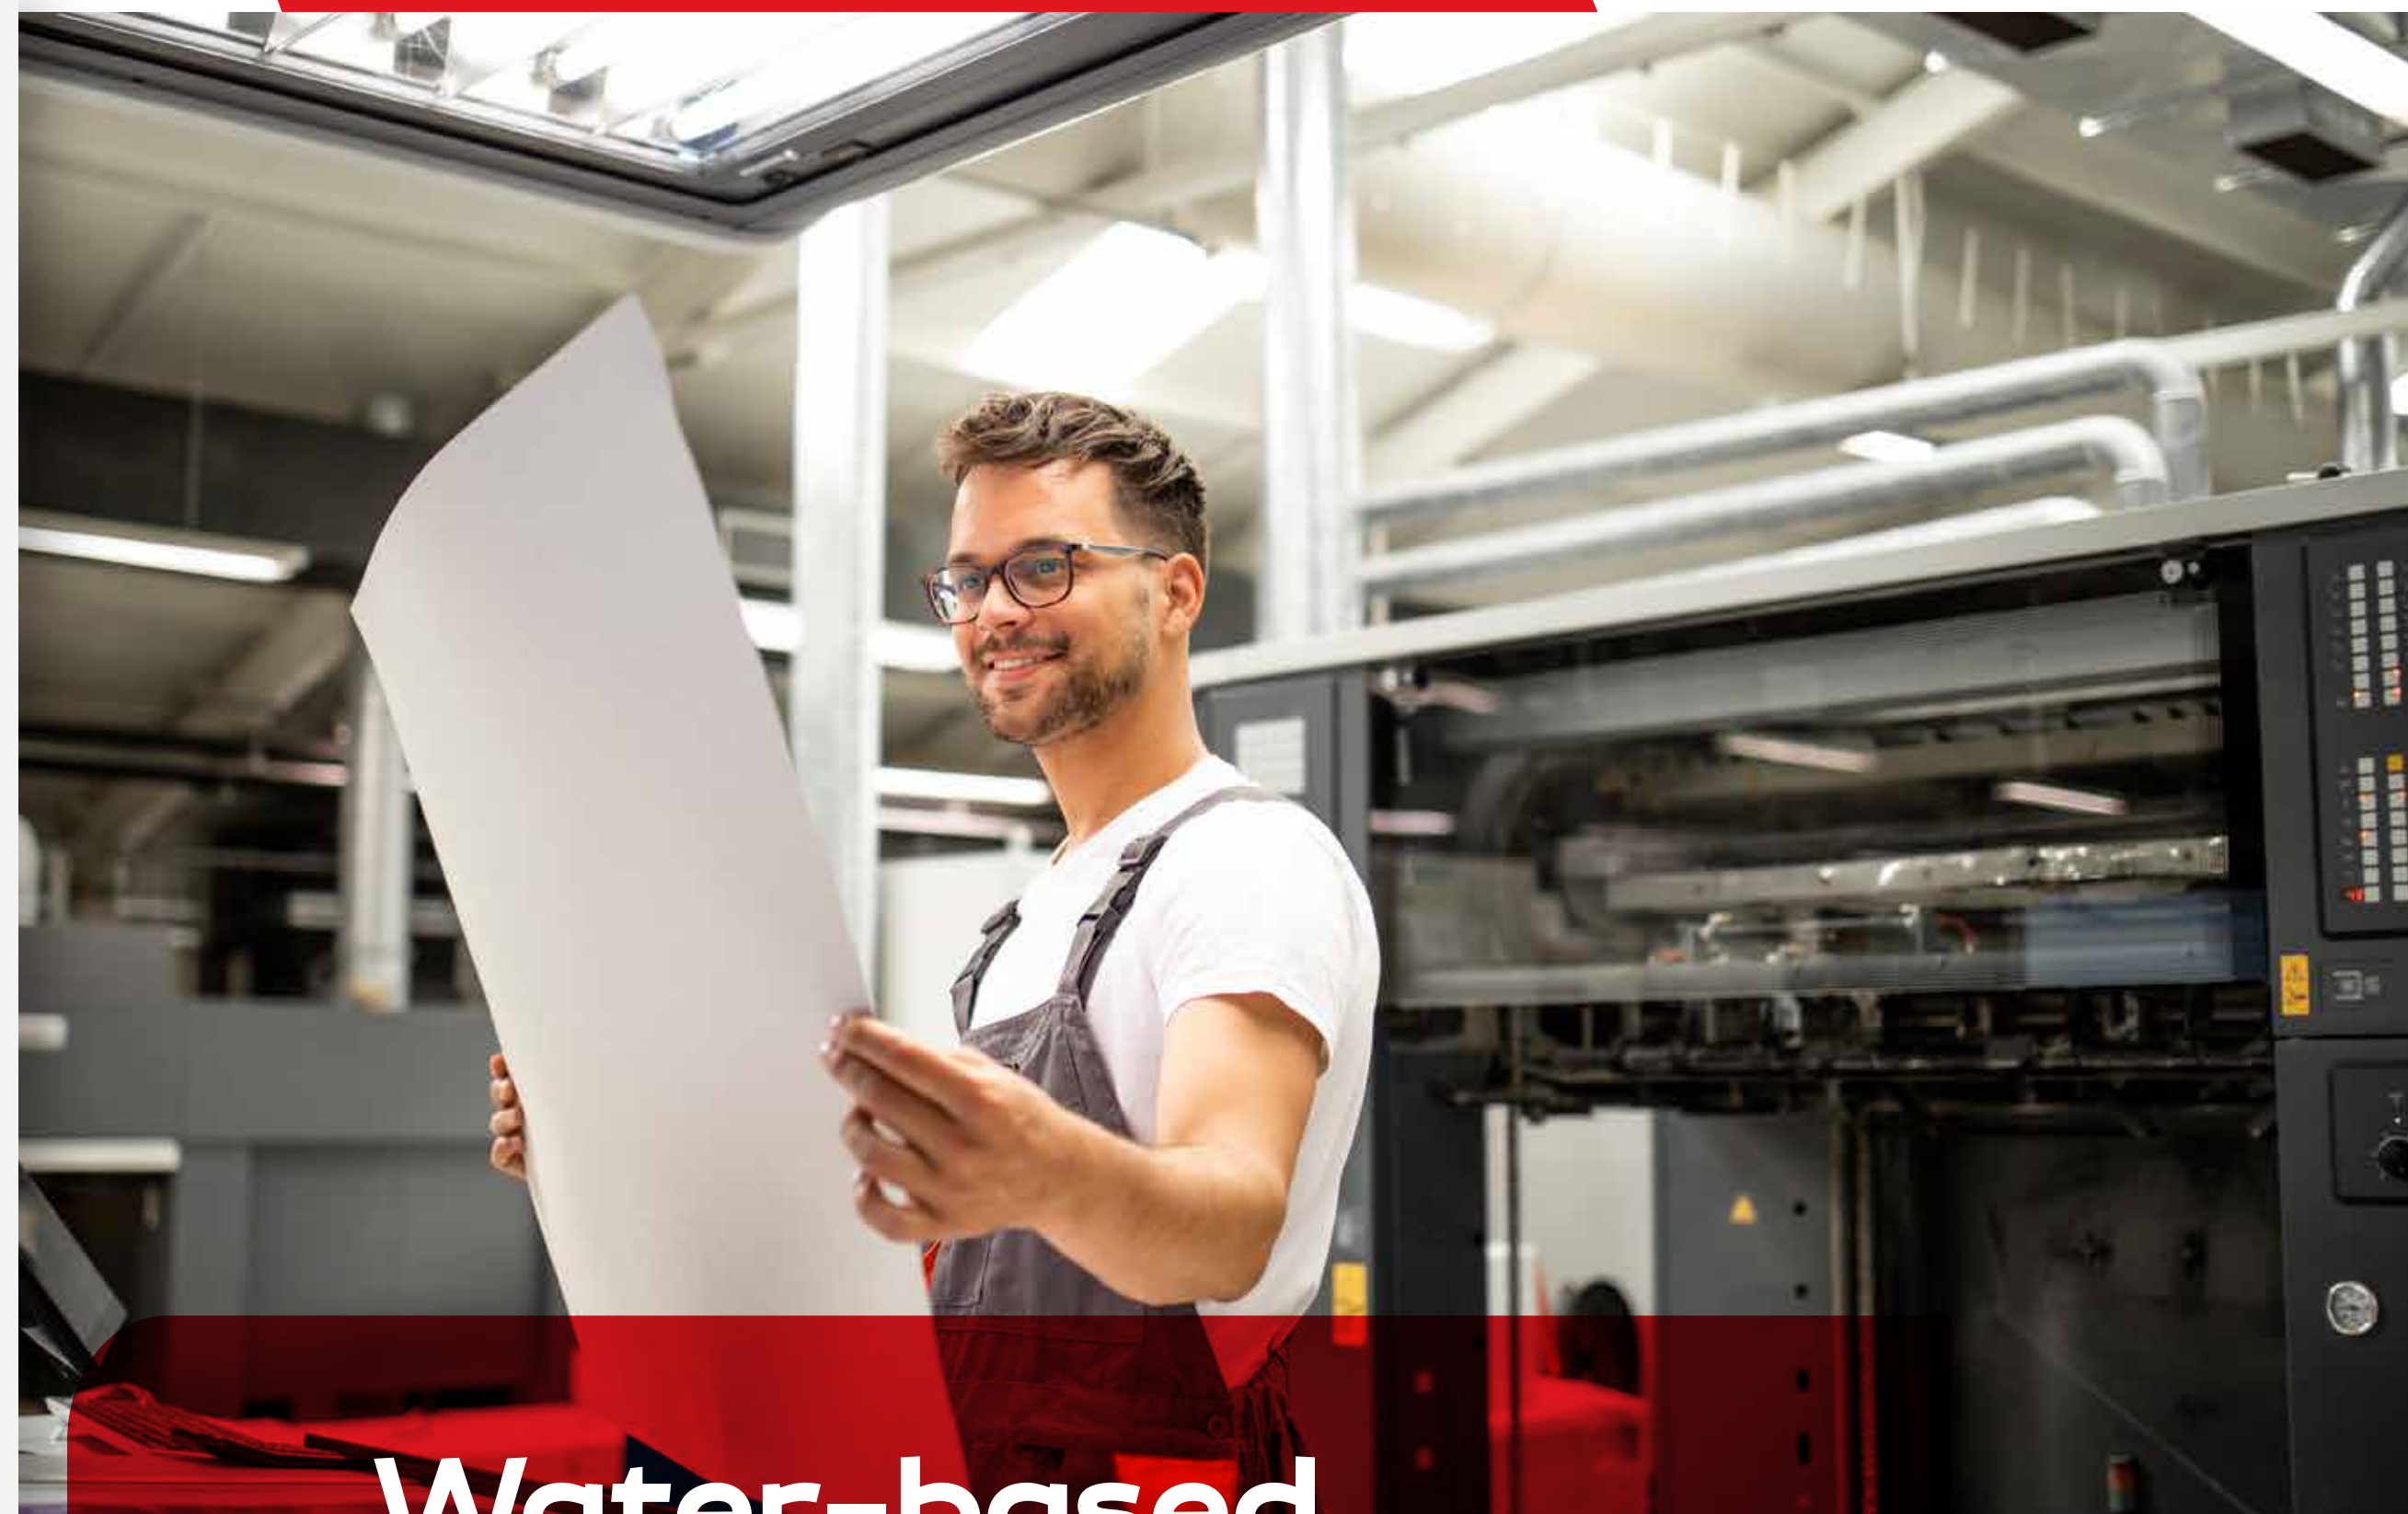

Our Water-based Inks and Pastes portfolio;

- Flexo Inks

Our Water-based Coatings portfolio;

- Flexo Coatings

- Offset Coatings

Industrial Adhesives

Industrial Adhesives

Fast and Effective Solutions to Fast Moving Products!

Our Flexible Packaging Laminating Adhesives offer several products for the fast-growing, high-speed, and high-quality environment of the Flexible Packaging Industry. With solvent-based, solventless, and water-based technology, Frimpeks covers a wide range of applications in the packaging industry. Frimpeks polyurethane and water-based adhesives offer an increase in efficiency, handling convenience, and improved chemical and thermal resistance to the market. From snacks to retort applications, Frimpeks solventless, solvent-based, and water-based adhesives propose a new pace of solutions to the flexible packaging industry.

Industrial Adhesives

Easy Solution for Hard Challenges!

If you need an adhesive for demanding applications and materials, Polyurethane Reactive HotMelt product range is undoubtedly the best choice.

Our Polyurethane Reactive HotMelt Adhesive is the preferred choice in its field and is designed to provide the best solutions for our customer's production processes and final products.

Our product portfolio includes;

• Flat Lamination Adhesives

• Textile Lamination Adhesives

• Composite Material Adhesives

• Automotive/White Goods Adhesives

• Profile Wrapping Adhesives

PUR HotMelt Adhesives

Industrial Adhesives

Developed for Durability and Strength!

Our Liquid Polyurethane Adhesives have high adhesion strength and cure quickly on the surfaces where they are applied.

They are formulated with a simple application, strong, economical, aesthetic, and balanced structure in mind, whilst a very small amount of consumption on the surface.

Some of the industries where our products are used;

Maritime and Maritime Transportation

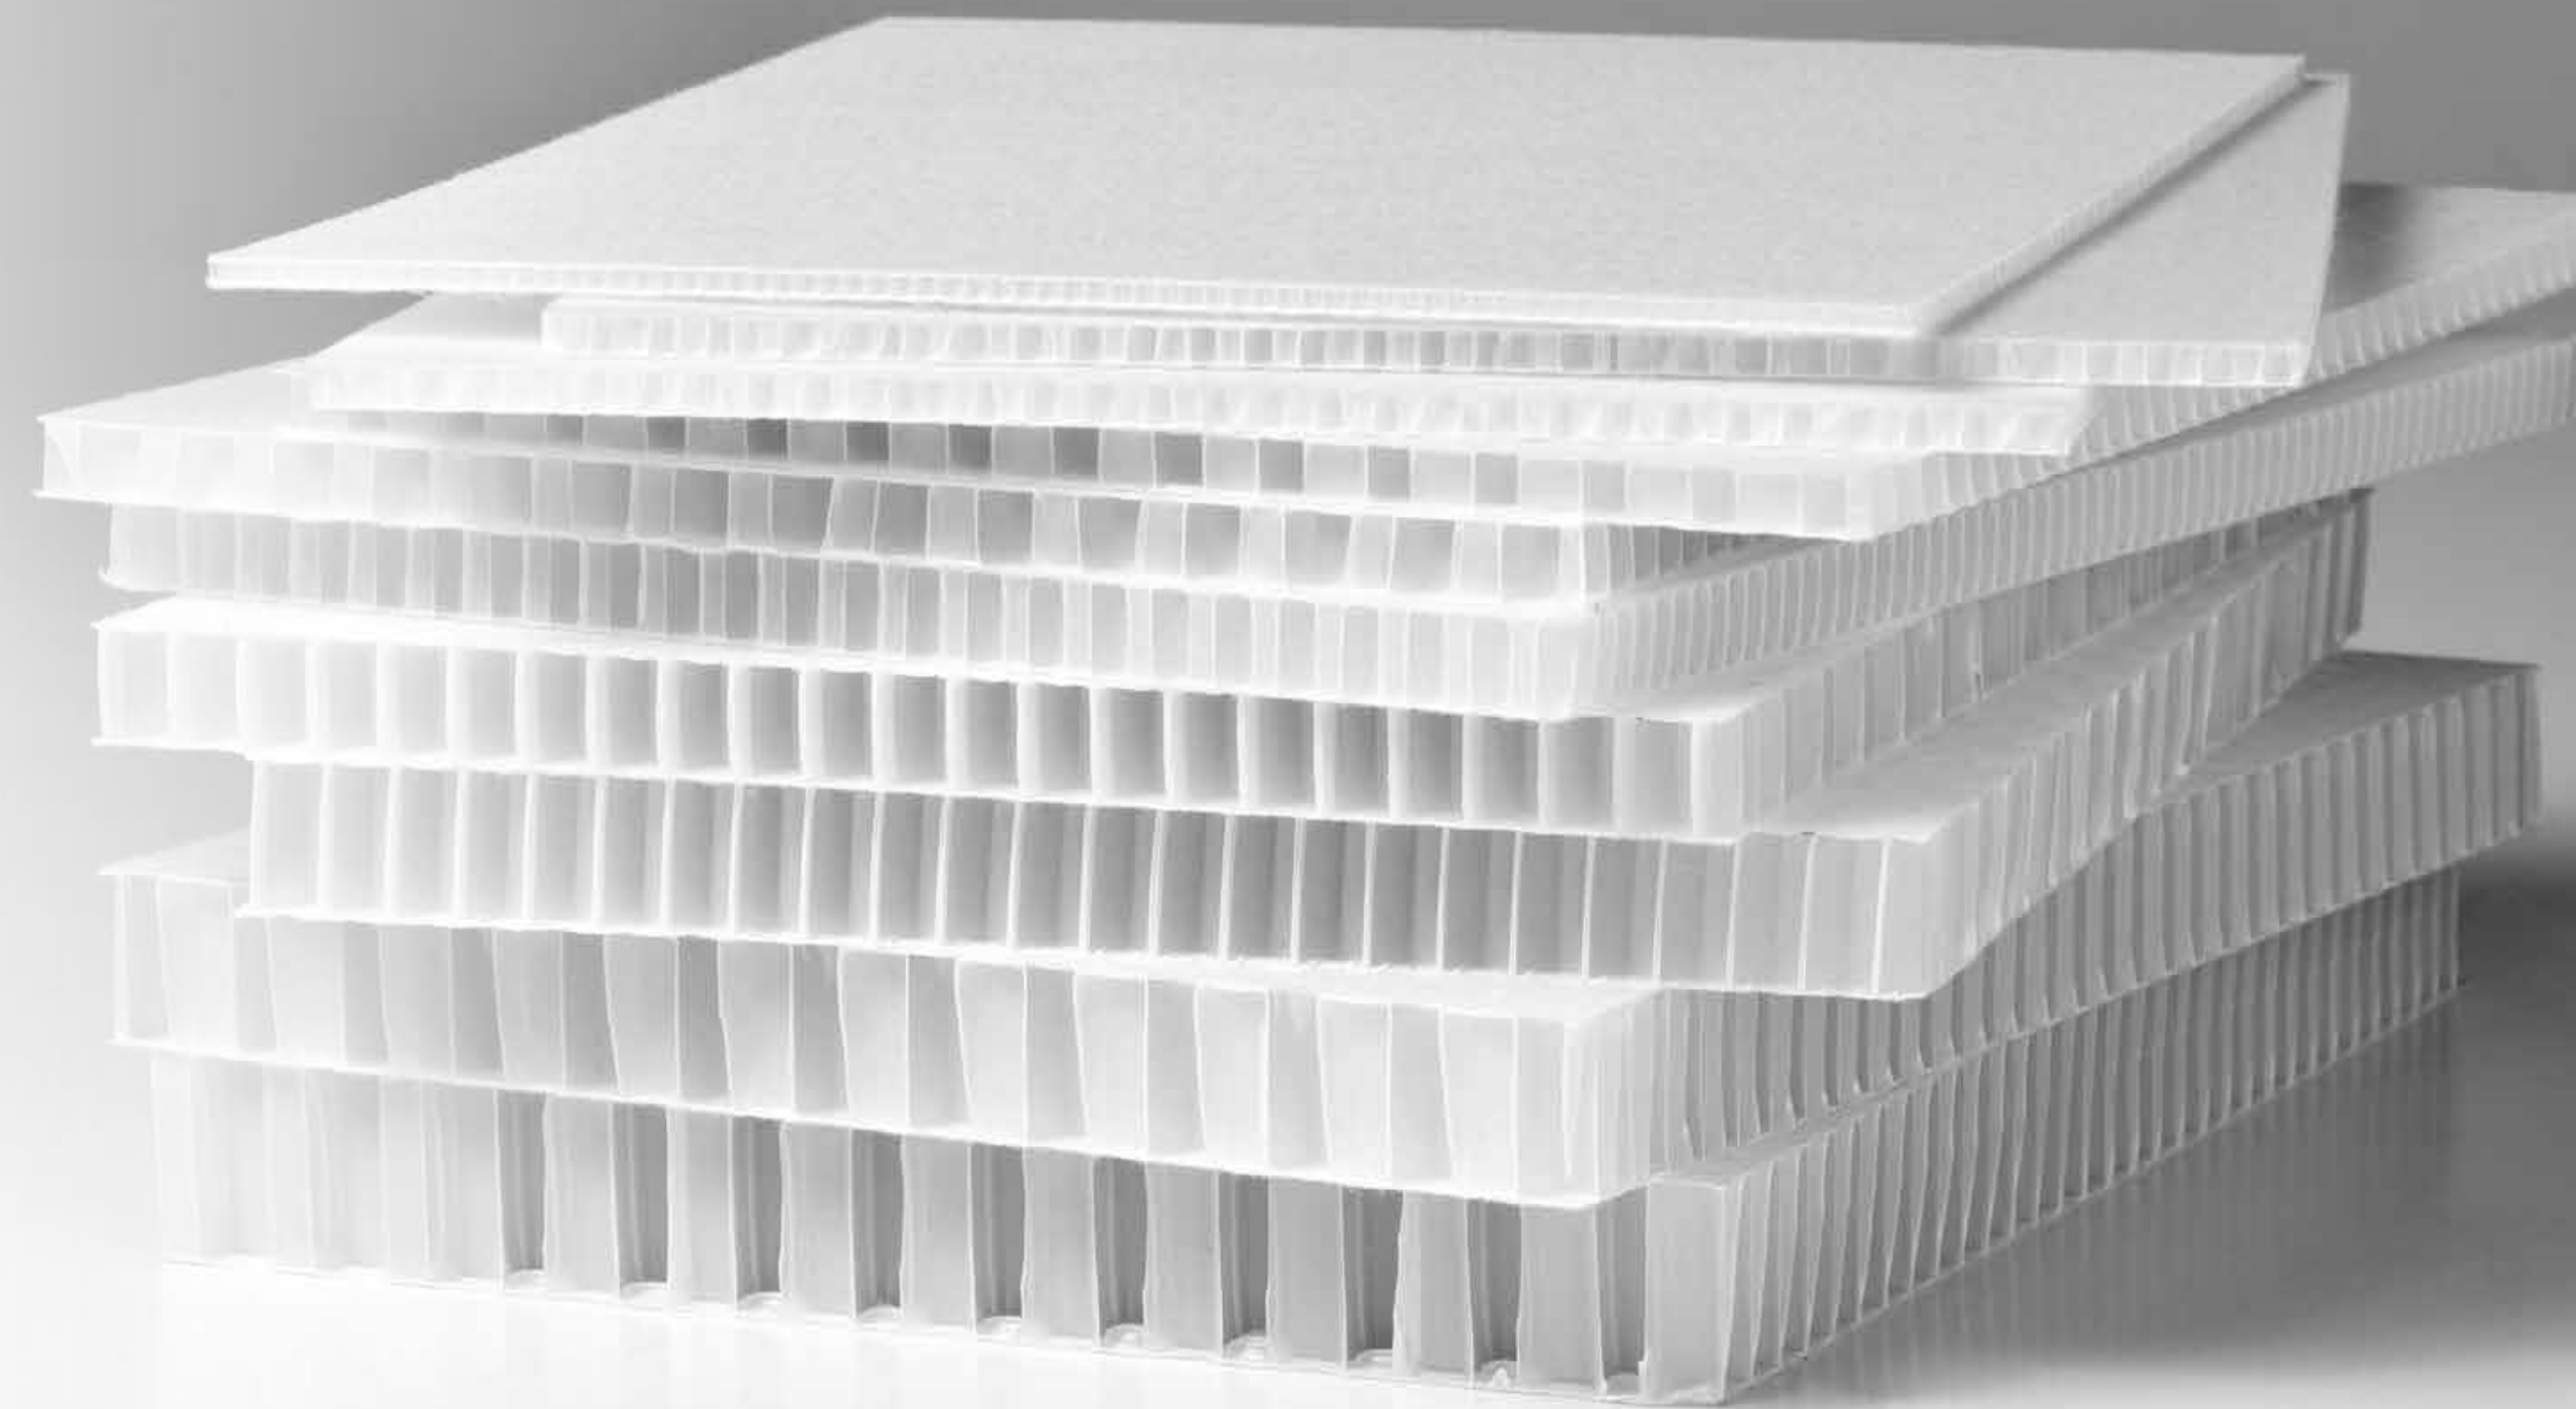

Our products are used as an auxiliary material in the manufacture of ships, boats and similar transportation systems.

Construction and Building Industry

Our products are used in the bonding of floor products, doors, windows, marble, and similar flooring bonding.

Automotive Industry

Our products are generally used for bonding composite materials in many parts of the production industry.

Strong and Solid Lamination

The textile industry, crucial for everyday items such as bedding, upholstery, and clothing, has grown substantially. There has been a notable expansion in the variety of materials, particularly with lamination techniques using adhesives to create strong and reliable bonds. The technical textiles industry has consistently expanded in recent decades, driven by contemporary trends and evolving needs. The PURPEKS series of PUR adhesives offers a comprehensive range of solutions meticulously designed to meet specific requirements and incorporate alternative technologies.

The image features two large rolls of industrial coating material resting on a light-colored wooden surface. The roll in the foreground is a dark, textured material, possibly a composite or fiber-reinforced polymer, showing a dense, fibrous structure. The roll behind it is a lighter, more uniform material, possibly a resin or a different type of composite. The lighting is soft, highlighting the textures of the materials and the grain of the wood. A dark purple rounded rectangle is overlaid on the left side of the image, containing the text 'Industrial Coating Chemicals' in white.

Industrial Coating Chemicals

Wood Coating is an Art Form!

Our goal in our Wood Coating Chemicals is to combine innovation, high quality, and low environmental impact.

In order to achieve this goal, our experts, together with the technical support team, develop innovative, high-performance products that can deliver the best results in terms of aesthetics and performance without compromising on production process duration, responding most effectively to customers' needs and applications.

Our product portfolio contains,

- PDL Flooring Chemicals
- PDL Backing Chemicals
- PDL Furniture Chemicals
- Panel Door Chemicals
- Furniture Chemicals
- Melamine Coating Chemicals
- Laminated Floor Chemicals

Wood Coating Chemicals

Industrial Coating Chemicals

More Than Plastic Coating!

Ever-changing furniture trends not only appeal to the eye but are also shaped according to the diversifying consumer needs.

In this context, PVC-coated MDF profiles are used in furniture designs in different ways, from table legs to cover surfaces, and from crown profiles to edge profiles. Different color and pattern requirements in PVC materials used in these profiles are constantly increasing due to ever-lasting customer demands.

Our portfolio includes;

• PVC Edge Banding Chemicals

We have been successfully serving PVC Edge Band manufacturers in the furniture industry for years. We work together with our customers and build business strategies that will increase the sales, efficiency and profitability of our customers by producing customer-specific solutions.

Plastic Coating Chemicals

• PVC Panel Chemicals

PVC Panels can be used for a wide variety of purposes for prefabricated buildings, interior-exterior, roofing, sound barrier, insulation, and much more.

Our wide range of products help manufacturers to produce high-quality PVC panels to satisfy your customer needs.

• SPC and LVT Flooring Chemicals

With the new technological advancements SPC and LVT flooring came to our lives. So we started to produce and supply manufacturers with a wide range of products for the best production possible.

Industrial Coating Chemicals

Re-Vitalize Your Glass!

We have worked with glass manufacturers and introduced many innovations to enhance the industry. We provide our customers in the glass industry with UV-curable glass paints and solvent-based primers in various colors as basecoats for digital printing on glass.

Especially the white background we use on the glass surface has a great positive effect on the appearance of the digital printing on the surface. In addition to the existing white ground color; light brown, cream, black and gray colors are also available.
